Boomerang Wall / Zid bumerang

"Terra Incognita", 6b+ (6a obl.)

Made by the Austrians Rüdiger Holesinner + Peter Pesendorfer
27. and 28. 03. 2021

- Very nice climb in a wonderful landscape!
- 11 runners are enough. Friends are not necessary, - but you can easily use them in some pitches! We subsequently defused all "run-outs" - that happened during the first ascent and set additional bolts!

- Approach: Start at the parking lot for "Born to live" and "Tommy" at Miletin Bor. Appr. 15 min. up towards Mali Borovac. At the large gravel-field, however, turn left. Follow the "stone mentrail" up into a light forest. Almost horizontally on a good path to the start of the route "Shuttle, 5a/b" (flat plate with 10mm Inox-Bolt). ~ 30 min. from [P] Climb "Shuttle" in 7 pitches to the end. From there ~ 60m to the left where the big and fantastic Boomerang Wall (Zid bumerang) begins.

- Descent: After the 5th pitch you can return via an well established "Abseiling-slope" (60m single rope!) to the beginning of the Boomerang Wall. From there

- abseil down (6 or 7 times) - using the stands of "Shuttle" (60m single rope!). And then: walking back to the [P] ~ 2h - See the wall picture!

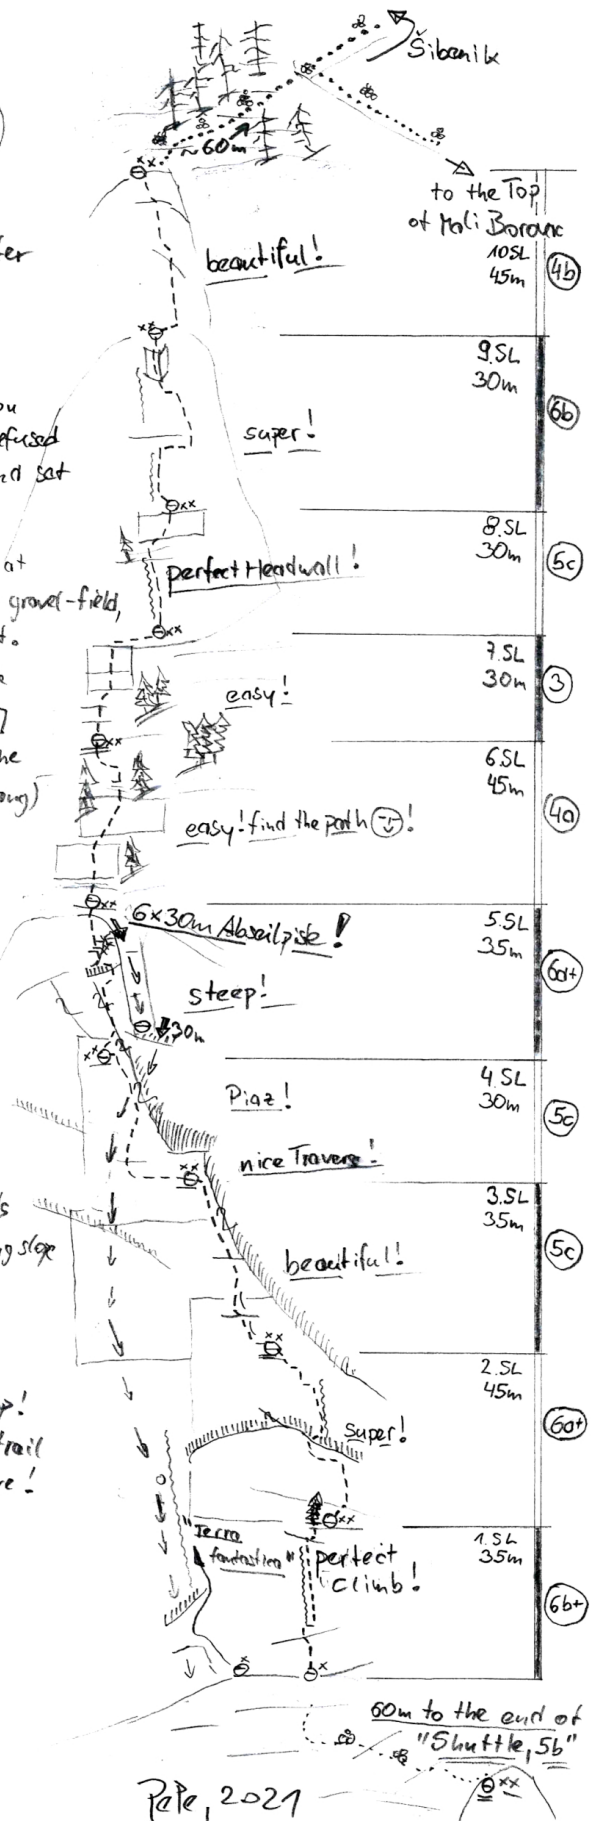

Abseiling from the Top is also possible - we have done!

- But you need a 50m double-rope! The upper stands are not "set up" for abseiling - till the Abseiling slope starts! - See the wall picture!

- By walking! The hiking trail from Mali Borovac to Šibenik is only ~ 60m away from the Top! So you can walk back very easy on the hiking trail to Miletin Bor. ~ 1,5h - See the wall picture!

We wish you a nice trip!
Have fun!

Peter + Rüdiger
